	Tamil Zukin	Daniel Zirker Primary Examiner Art Unit: 1771				

U.S. Patent and Trademark Office PTOL-303 (Rev. 08-06) Continuation of 5. Applicant's reply has overcome the following rejection(s): Certain of the 35 USC 112, 2nd paragraph rejections would have been overcome.

Continuation of 11. does NOT place the application in condition for allowance because: The Examiner first notes that applicants have failed to even mention the prior art rejection of record, which even if the amendments had been permitted would not have overcome the rejection of claim 1 and its dependent claims. As previously stated in paragraph No. 5 of the final rejection it is firmly believed that a Declaration properly supporting several of the earlier made arguments is definitely needed. As to the 112 2nd paragraph rejections although some would have been overcome (as well as the 112 1st paragraph rejection of record) several would not have been. That is, "high refractive index layer" in claim 1 is still believed improper in this claim for reasons of record and "disposed directly" is a new issue which in view of the multiple other problems the Examiner is not inclined to overlook. Also, the phrase "is formed by conducting transfer using the antireflection film for transfer" in claims 8 and 16 is still unclear despite the pointed out definition for transfer; the cancellation of the clause "contained in the high refractive index layer" without a corresponding amendment in claim 14, line 2 is improper, and the insertion of "ultravioler rays" in claims 6 and 14 for "a radiation" is technically a new issue. The Examiner suggests refiling the case as an RCE in which these problems and perhaps others can be more carefully reviewed.
